Indiana, USA (Open to relocate) | +1 682-406-7329 | devarshvora45@gmail.com | [LinkedIn](#) | [Portfolio](#)

Strategic Data Analyst with 3+ years of experience delivering insight-led solutions across finance, retail, and product domains. Adept at applying statistical analysis, data modeling, and business intelligence to transform complex, high-volume datasets into actionable outcomes that support scalable, long-term growth initiatives. Proven ability to leverage SQL, Python, and advanced analytics frameworks to drive evidence-based decision-making, optimize operational performance, and deliver measurable business impact across cross-functional teams, leadership stakeholders, and enterprise-wide strategic initiatives at scale.

Professional Experience

Data Scientist, CyberdomeUSA – Indiana, USA

Aug 2025 – Present

- Analyzed large-scale behavioral and transactional datasets to identify risk patterns, perform ad hoc analysis, and uncover usage trends, improving detection accuracy by 50% and supporting data-driven decision-making across enterprise teams.
- Built and maintained analytical datasets by integrating structured and semi-structured sources, enabling cohort analysis and faster access to insights that improved investigative turnaround time by 25–30% across analytics workflows.
- Designed and optimized end-to-end data pipelines using SQL, dbt, and Spark to support scalable analytics, enabling trend exploration and improving data reliability and processing efficiency across reporting systems.
- Developed interactive dashboards and reporting solutions to support ad hoc analysis, cohort studies, and performance tracking, helping stakeholders identify trends, monitor KPIs, and make informed business decisions.

Graduate Assistant, University of Texas at Arlington – Texas, USA

March 2024 – May 2025

- Conducted in-depth analysis of customer and behavioral datasets using Python and statistical techniques to improve segmentation accuracy and drive data-informed insights, increasing campaign effectiveness by 15–20%.
- Engineered and optimized scalable data pipelines using Apache Airflow, Spark, and SQL to enhance processing efficiency, reliability, and performance across large-scale enterprise analytics platforms and environments.
- Supported analytics delivery by maintaining version-controlled data workflows and reproducible environments, ensuring reliable reporting, consistent metrics, and scalable analytical processes across cross-functional teams and stakeholders.

Business Intelligence Intern, Quintessence Knowledge Services – Remote, Dubai

Feb 2023 – June 2023

- Supported financial data extraction and reporting workflows using SQL and Excel across multiple client engagements, contributing to structured analyses that informed advisory recommendations for consulting leadership and stakeholders.
- Built summarized financial reports and performance snapshots to track client KPIs and business metrics, helping senior consultants communicate data-backed findings clearly and confidently during client review sessions.
- Performed exploratory analysis on operational and financial datasets to surface trends and irregularities, assisting the advisory team in identifying cost reduction and efficiency opportunities across active consulting projects.
- Assisted in standardizing data validation processes and reporting templates across client deliverables, improving consistency and reducing manual effort in recurring financial reporting cycles throughout the internship.

Data Scientist, CrystalVox Limited – Gujarat, India

July 2021 – Dec 2022

- Analyzed large-scale operational and transactional datasets using SQL and statistical techniques to evaluate performance drivers, identify inefficiencies, and support data-driven decision-making across business workflows.
- Built and maintained analytical pipelines using Spark and modern data transformation frameworks to process structured and semi-structured data, enabling faster insights and improving overall data quality across reporting systems.
- Applied regression analysis, cohort analysis, and feature-based modeling to evaluate operational performance and resource utilization, driving data-informed optimizations that contributed to \$50K+ in cost savings across core business workflows.
- Developed interactive dashboards and analytical reports using Tableau to monitor KPIs, visualize trends, and surface actionable insights, reducing process drop-offs and improving overall operational visibility by 20%+.

Skills Summary

- **Programming & Analytics:** Python, SQL, R, Statistical Analysis, Data Wrangling, Exploratory Data Analysis, Advanced Excel
- **Data Engineering & Management:** ETL Pipelines, Data Warehousing, Data Cleaning, Transformation, Workflow Automation
- **Statistical & Predictive Analysis:** Hypothesis Testing, Regression Analysis, Time Series Forecasting, Clustering, A/B Testing
- **Business Intelligence & Visualization:** Tableau, Power BI, Looker, Matplotlib, Seaborn, Dashboard Design, KPI Reporting
- **Data Modeling & Optimization:** SQL Performance Tuning, Data Modeling, Query Optimization, Dimensional Modeling
- **Data Governance & Quality:** Data Validation, Quality Assurance, Data Documentation, Compliance, Process Standardization

Education

The University of Texas at Arlington, Master of Science in Computer Science
Gujarat Technological University, Bachelor of Science in Information Technology

Aug 2023 – May 2025 | Texas, USA
Aug 2019 – May 2023 | Gujarat, India
